Highly motivated Software Engineer experienced at combining technical expertise with innovative ideas. Seeking an opportunity as a Software Engineer with a forward thinking company that values creative problem solving, determination, collaboration and continued learning.

## Technical Experience

- **<u>Project Marvel</u>** -An application to get Marvel comic character information and movie data.The Project Marvel application is set to allow users to search their favorite comic characters and retrieve their comic description. If they desire they can pull movies up and get the Movie plot, statistics, director(s),writer(s), actors and movie reviews.
- **<u>Lost & Found</u>**:This web application allows user to submit items they've lost and may not be able to retrieve the items by themselves. Which allows users to upload an item name, detailed description, and reward amount. The item is then placed on the homepage to make other users be aware of the item. Items can then be reported found and the user who posted the item will be notified with a notification through the application.

## Technical Skills
